

Week of June 18 to June 24, 2026

Meeting report for Jordan: current dashboards, shipped attribution work, and open handoffs.

For: Jordan **From:** Shela **Period:** June 18 to June 24, 2026 **Generated:** June 25, 2026

Biggest signal this week: **traffic and booked-call volume improved, while created accounts stayed below last week**. June 18 to June 24 closed at **8.5K users, 9.5K sessions, 12.5K views, 16 booked calls**, and **26 created accounts**. The main shipped item is signup attribution into Close, with paid and blog UTM paths now merged and deployed.

Dashboard Summary

- **Website Traffic** moved up week over week: users rose to 8.5K and sessions rose to 9.5K, while page views held near 12.5K.
- **Conversions** were mixed in a useful way: booked calls jumped to 16 from 7, while created accounts moved to 26 from 30.
- **Traffic Insights** shows 2,285 tracked sessions for June 18 to June 24, with the blog as the largest tracked bucket at 800 sessions.
- **Domain Rating** remains 3.27/10 on the OpenPageRank scale, checked June 25. OpenPageRank is a different scale from the old Ahrefs DR.
- **AI Visibility** is current from the June 21 AEO run: 38.3% combined mention rate, 59 of 154 prompts cited by at least one engine, 8 wins, and 12 gaps.
- **AEO wins** remain strongest around Secretary of State API and Cobalt vs Middesk prompts; the biggest gaps remain registered-business, Texas, New York, and step-by-step SOS API queries.
- **Newsletter** now tracks performance through June 25: 335 unique opens, 48.55% open rate, 3 latest clicks, and 383 average unique opens across the last 5 tracked editions.
- **YouTube** now uses the corrected Studio export through June 24: 9,969 views, 94.1 watch hours, 27 new subscribers, 51 unsubscribes, net -24 subscribers, 27 likes, 5 comments, and 34 shares.

Completed This Week

Signup attribution wired into Close DONE

- **Two attribution PRs were merged and deployed** for the signup path.
- **Working Planet paid ads now preserve paid params** and write Paid Ads source, network, source, and keyword into Close.
- **Blog CTAs now preserve UTM params** and write UTM source, medium, campaign, and content into Close so the signup-driving blog slug is visible.
- **Copilot review comments were addressed**, review threads were resolved, and CI passed on both PRs before merge.

In Progress

Demo booking attribution follow-ups IN PROGRESS

- **Production demo landing page still needs a root-cause check** because the live probe returned a CloudFront 403.
- **SavvyCal access path is still the next dependency** for building a SavvyCal to Close sync so booking metadata updates the matching Close lead.
- **Post-deploy verification remains open**: run one paid signup and one blog UTM signup, then confirm the expected fields land in Close.
