

Week of May 21 to May 27, 2026

What got done, what is in progress, and the current dashboard state.

For: Jordan **From:** Shela **Period:** May 21 to May 27, 2026 **Generated:** May 28, 2026

Biggest signal this week: **traffic normalized after last week's spike**. May 21 to May 27 closed at **54,536 users, 53,270 sessions, 61,231 views, 2 booked calls, and 22 created accounts**. On the work side, the full rows 68 to 83 Cobalt Webflow blog batch is live, the Newsletter KPI is current through May 28 from Beehiiv MCP stats, the YouTube KPI was rebuilt from the May 28 export, and the SEO dashboards are ready for Jordan review with a clear SOS traffic alert.

Dashboard Summary

- **Website Traffic** closed at 54,536 users, 53,270 sessions, and 61,231 views for May 21 to May 27.
- **Conversions** dropped to 2 booked calls and 22 created accounts after last week's Working Planet and test-traffic-influenced spike.
- **SEO Scraping Monitor** processed May 27 and raised 3 alerts: SOS organic sessions down 29.2% vs baseline, SOS bounce rate up 13.6 points, and GSC SOS impressions down 20.9%.
- **Domain Rating** remains on the OpenPageRank scale at 3.27/10, checked May 28. OpenPageRank's source-side last update is still March 28, 2026.
- **AI Visibility** is current for weekly cadence from the May 24 run: 154 prompts, 68 cited-any prompts, and 44.16% combined mention rate across Perplexity, OpenAI, and Gemini.
- **Newsletter** is current through May 28. Beehiiv MCP backfilled May 2 through May 28 sends, open rate, clicks, CTR, web views, unsubscribes, and unique opens.
- **YouTube** is refreshed from the May 28 export, covering Feb 27 to May 27: 12,015 views, 7,315 engaged views, 108.4 watch hours, -13 net subscribers, 30,920 impressions, and 2.9% CTR.

Completed This Week

Cobalt Webflow blog batch rows 68 to 83 published DONE

- **Sixteen Cobalt posts are live** from Topic Queue rows 68 to 83, covering UCC, OFAC, EIN, adverse media, beneficial ownership, Secretary of State, and Kentucky business search topics.
- **Publish QA passed:** all drafts passed QA, all slugs were new before create, Webflow live verification passed, and public URL probes returned HTTP 200.
- **Tracking was updated:** Topic Queue, Existing Articles, Master Blog Inventory, and both Cobalt published-blog indexes were read back with the expected published records.

Status: final audit passed with 16 live, sheeted, and indexed posts. Canva carousel URLs remain marked Required.

Newsletter KPI backfilled from Beehiiv MCP

DONE

- **Beehiiv OAuth and MCP access worked** for the dashboard refresh. May 2 through May 28 posts were pulled with ``list_posts``, ``get_post``, and ``get_post_stats``.
- **Edition Stats rows 89 to 100 are populated** across H:N: sends, open rate, unique clicks, CTR, web views, unsubscribes, and unique opens.
- **Latest edition:** May 28, Banks Push \$300B Into Private Credit Leverage, 660 sent, 47.26% open rate, 310 unique opens.

Verification: Google Sheets readback checked all 12 May rows and found no blanks in H:N.

Beyond Banks May newsletter work shipped

DONE

- **FundCanna specialty-credit edition shipped** with Stage 9 closeout and live Beehiiv URL now resolved.
- **EverBank and American Tool Ch. 11 edition shipped** with Beehiiv stats now tracked at 557 sent, 60.00% open rate, and 333 unique opens.
- **Banks and private credit leverage edition shipped May 28** and was included in the KPI backfill the same night.

Source: Beyond Banks Newsletter KPI dashboard and Edition Stats sheet.

YouTube KPI refreshed from May 28 export

DONE

- **New export imported** from YouTube Studio for Feb 27 to May 27, then the dashboard was rebuilt and pushed.
- **Top videos by export views:** Construction Lending Verification, Annulled Entities, EIN Verification Step One, Stale SOS Data, and Synthetic EIN Fraud.
- **Known export limit:** the current export does not include likes, dislikes, comments, shares, or separate subscribers gained and lost.

Status: current through May 27 because that is the latest date inside the May 28 export.

In Progress

SOS organic traffic alert review

IN PROGRESS

- **Alert state:** SOS organic sessions are down 29.2% vs baseline, SOS bounce rate is up 13.6 points, and GSC SOS impressions are down 20.9%.
- **Next check:** separate temporary traffic normalization from durable ranking, page, or source-quality movement.
- **Meeting framing:** the weekly SEO row is current, but the movement is negative enough to discuss directly.

Blog batch derivative assets

IN PROGRESS

- **Rows 68 to 83 are published**, but Canva carousel URLs remain marked Required.
- **Next production step:** create the carousel assets and update the queue rows once URLs exist.
- **Reason to keep visible:** the written posts are live, but the social distribution package is not complete.
