

# Week of June 25 to July 1, 2026

Meeting report for Jordan: current dashboards, Working Planet ad feedback, and live signup attribution.

**For:** Jordan   **From:** Shela   **Period:** June 25 to July 1, 2026   **Generated:** July 2, 2026

Biggest signal this week: **created accounts jumped to 39 from 26 even as traffic cooled**. June 25 to July 1 closed at **7.4K users, 8.7K sessions, 11.9K views, 15 booked calls**, and **39 created accounts**. The two main shipped items are the full ad-creative feedback pack delivered to Working Planet and signup attribution now confirmed live in Close.

## Dashboard Summary

- **Website Traffic** cooled after last week's bump: users at 7.4K from 8.5K, sessions at 8.7K from 9.5K, and views near 11.9K.
- **Conversions** moved the right way where it matters: created accounts rose to 39 from 26, and booked calls held at 15 versus 16 last week.
- **Traffic Insights** was refreshed July 2 covering June 25 to July 1 and mirrors the GA4 cooldown across tracked pages.
- **Domain Rating** holds at 3.27/10 on the OpenPageRank scale, checked July 2, no change since last week.
- **AI Visibility** improved on the June 28 AEO run: 43.5% combined mention rate with 67 of 154 prompts cited, up from 38.3% and 59 prompts on June 21, with 8 wins and 12 gaps.
- **AEO wins** stay strongest on Secretary of State API and Cobalt vs Middesk prompts; registered-business, Texas, and New York queries remain the biggest gaps.
- **Newsletter** is current through June 30: the latest edition opened at 59.0% with 434 unique opens, and the June 27 edition set the all-time unique-opens peak at 458.
- **YouTube** from the June 3 to June 30 Studio export: 2.6K views, 25.6 watch hours, and net -15 subscribers with 4 gained and 19 lost. Subscriber motion is the number to push next.

## Completed This Week

### Ad creative feedback pack delivered to Working Planet DONE

- **Reviewed all 5 paid ads with per-ad rewrites:** audience-named hooks, a real customer or hard number in every headline, and product screenshots over stock imagery.
- **Shared the message framework and testimonial bank** with approved, attributed quotes from 1West, Idea Financial, and Bectran so round two can drop proof straight in.
- **Shared the email sequence content doc** so their copy can reuse hooks and angles we already know convert.
- **Backed the notes with analytics:** our most-viewed Shorts each name a precise verification job plus a real-time benefit, never the generic category.
- **Agreed to run their current plan first** and watch results, with testimonials suggested as the one addition.

### Signup attribution confirmed live in Close DONE

- **UTM and paid-ad details now flow into Close** when someone creates an account or starts a free trial.
- **Confirmed the UTM fields showing in Close come from this work**, which closes last week's post-deploy verification item.

### Beyond Banks published two editions DONE

- **June 27:** [Goldman backs Taktile with \\$110M as AI automates 95% of business-loan underwriting](#). Set the all-time unique-opens peak at 458.
- **June 30:** [LendingClub is now Happen Bank, funded by deposits](#). Opened at 59.0% with 434 unique opens.

## In Progress

### Working Planet round-two creatives IN PROGRESS

- **Watching for revised ads** that adopt named audiences, customer proof, and product screenshots per the feedback pack.
- **Monitoring UTM-attributed signups in Close** as new paid traffic lands, now that attribution is live end to end.
